

Victor Morales

Web Developer

Work Experience

FRONTEND DEVELOPER

EASYGOBAND | October 2022 - Present

As part of the Frontend development team, I am responsible for developing new features, fixing bugs, conducting code reviews, and performing QA for projects focused on solutions for hotels and events. In addition to my role as a Frontend developer, I also contribute to backend and desktop projects, mainly using Java and Kotlin. Work management and planning follow the SCRUM methodology, using Jira to track each sprint.

Stack: VueJS, Css/Sass, JavaScript, TypeScript, Java, Kotlin, Docker, Figma

Main projects

- **User webapp** for account management during an event, allowing users to register, check their available balance, request refunds, generate QR codes for event access, and view relevant information.
- **Top-up Kiosk** for large-scale events, allowing users to add balance to their accounts by depositing cash. The balance is then linked to the user's account via an NFC device, enabling cashless transactions within the event.
- **Redesign of a webapp** focused on hotel guests, involving a complete overhaul of the booking-related modules. The design was adapted to provided mockups, and the code was refactored to align with the new interface.

BACKEND DEVELOPER

Deporprivé | February 2022 - October 2022

I am part of the backend development team, primarily working with Laravel to create services and support the main API, optimizing queries, and building modules using the MVC and Repository architectures. Additionally, I contribute to development with Prestashop and Vue.js, creating new views for both the e-commerce platform and the administrative backoffice. Daily meetings are held following the SCRUM methodology to share status updates and present progress.

Stack: Php, Laravel, Mysql, Prestashop, JavaScript, Css, GitHub, VueJs

Main projects

- **Internal ERP** for inventory control, promotions, discounts, restocking management, and supplier handling.
- **CRM** for suppliers to directly view available stock, sold items, backordered products, and bestsellers, along with the automatic generation of purchase orders based on available stock.
- **Modules** within the Prestashop backoffice for viewing active orders, refunded orders, and general account data.

WEB DEVELOPER

Nano Degree Latin America | November 2020 - January 2022

I'm a web developer focused on the HVAC industry. I work in a development team, where I am responsible for managing LAMP servers and analyzing client requirements, converting them into technical specifications for the development team. I work on both the backend and frontend, primarily developing SaaS web applications.

Stack: Php, Laravel, Mysql, LAMP, HTML, JavaScript, Css, Angular

Main projects

- **Service Quote Generator** Service quote generator for HVAC technicians, implementing user roles, a general dashboard for all technicians as well as individual dashboards, and three main modules focused on defining, creating, and exporting cost reports.
- **Logbook for Consultations and Courses** provided to clients through a calendar, allowing the registration and viewing of consultations in monthly, weekly, and daily views.
- **E-commerce** for HVAC products and energy solutions, with two main modules: purchasing and management. Features include a shopping cart, seller ratings, a section for comments and questions, notifications, and order tracking.

PROFILE

Web developer with over 4 years of experience and countless bugs successfully runned, skilled in both Frontend and Backend development, with a strong passion for solving challenges through lines of code.

SKILLS

Advanced ★★★★★

JavaScript
VueJs
HTML
CSS/SASS
Php
Laravel
Git/GitHub

Intermediate ★★

ReactJs
Angular
NodeJs
LAMP
Typescript
Java/Kotlin

SOFTSKILLS

- Fast learning
- Problem-solving
- Time management
- Critical thinking
- Attention to detail

LANGUAGES

Español - Native
Inglés - Intermediate

EDUCATION

TecNM en Celaya
(2015 - 2020)
